Experiment-7

7. Create a simple cloud software application for Payroll Processing System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Name of the employee, experience in present org , overall experience, basic pay, HRA, DA, TA, net pay, gross pay etc.

INPUT:

The image displays two screenshots of a web application titled "Student Attendance System." The interface includes a sidebar with navigation options: "Student Attendance System.", "Student Attendance System.", and "Student Attendance System. Report". The main content area contains a form with the following fields:

- Student Name:
- Register Number:
- Course:
- Attendance Date:
- Attendance Status: ☐ Present ☐ Absent
- Course Attendance:
- OD request: ☐ Yes ☐ No
- Attendance Percentage:

The bottom screenshot shows the same form with a "Submit" button at the bottom and a green progress bar above the "Attendance Percentage" field. The top bar of the application shows "Student Attendance System. Development" and "Trial expires in 10 days".

OUTPUT :

SAS

Student Attendance System.
